

Ernst Russ AG

Germany | Transport & Logistics | MCap EUR 235.8m

28 August 2025

UPDATE

Solid Q2, earnings beat on disposal gains; est./PT up; BUY

What's it all about?

Ernst Russ AG delivered a solid Q2 2025, with revenues of EUR 38.9m (-4.4% yoy) broadly in line with estimates, despite a smaller fleet. EBIT of EUR 15.3m beat expectations (+8% vs. mwb est.), supported by disposal gains from the sale of MS Andante, driving a strong margin of 39%. Net income after minorities rose to EUR 10.3m, while EPS of EUR 0.31 matched last year but exceeded forecasts. Operational performance remained robust with utilization at 97.3% and charter rates stable at USD 17,412/day. With ~84% of mwb FY25 revenues estimates already secured and more than EUR 30m disposal gains realized, guidance appears de-risked. We reiterate our BUY rating and increase our PT to EUR 11.00 (prev. EUR 10.00), as we increase our estimates following the company's better than expected Q2/H1 print.

Solid Q2, earnings beat on disposal gains; est./PT up; BUY

Q2 results slightly ahead of expectations Ernst Russ ("ER") reported Q2 25 results broadly in line on sales but ahead on earnings. Revenues came in at EUR 38.9m (mwb est.: EUR 39m), down 4.4% yoy due to a leaner fleet (26 vessels vs. 29 in Q2 24) following disposals and the absence of the MV Solong. Despite this, high fleet utilization (97.3%) and resilient charter rates (USD 17,412/day, flat yoy) provided stability. Technical availability was 97.3% (vs. est.: 99.2%), reflecting slightly higher downtime than forecast.

Earnings boosted by vessel sale EBIT reached EUR 15.3m, exceeding expectations by 8% (mwb est.: EUR 14.2m) and broadly in line with the prior year's EUR 15.5m. The key driver was the capital gain from the sale of feeder vessel MS Andante, partially offsetting the smaller fleet base. EBIT margin improved to 39% (vs. 36% est. and 38% in Q2 24). Net income after minorities of EUR 10.3m and EPS of EUR 0.31 were both comfortably above expectations and stable yoy, reflecting improving structural efficiency.

Streamlining and balance sheet strength Management continues to simplify the group structure by reducing minority interests, enhancing transparency and cash flow attribution to shareholders. With equity at EUR 283m and an equity ratio of 80%, ER retains significant balance sheet flexibility for further disciplined fleet expansion. Cash flow generation remains robust, with EUR 47.6m of operating cash flow delivered in H1.

Charter market resilience supports outlook ER's focus on feeder container vessels, supported by solid regional trade flows, continues to provide resilience against global shipping volatility. With ~84% of mwb FY25 revenue est. already secured under long-term charters and more than EUR 30m of expected disposal gains realized in H1, earnings visibility is high. Management reiterated FY25 guidance of revenues of EUR 147–167m and EBIT of EUR 75–105m (incl. vessel sales), which we see as well underpinned.

Company description

Ernst Russ is an international shipping company based in Hamburg. Parts of the company date back to 1893. The Group currently manages a fleet of 26 vessels partially operated with strategic partners. The focus is on container ships with a capacity of between 700 and 4,200 TEU, plus one larger container ship of around 13,400 TEU, a handysize bulker and a multi-purpose vessel.

Conclusion ER delivered another solid quarter, marked by strong margins, disposal-driven earnings upside, and stable charter fundamentals. The group's streamlined structure, healthy liquidity, and robust market positioning underpin an attractive investment case. We reiterate our BUY rating and increase our estimates (mainly lower share of minority interests but also lower cash at hand) following better than expected Q2/H1 results. As a consequence, we are increasing our PT to EUR 11.00 (previously EUR 10.00), highlighting upside potential and continued bottom-line momentum.

SWOT analysis

Strengths

- **A main shareholder with a strong business network:** The Döhle Group, the main shareholder (combined stake with JP & JD Döhle of approximately 75%), is one of the largest shipping companies worldwide. ER benefits from the Döhle Group's network, which aids fleet expansion, vessel transactions, and access to charter deals.
- **Solid financials:** ER has a solid balance sheet. The company has reduced its debt and increasing available funds for fleet potential expansion.
- **Fleet is chartered out:** The employment concept for the fleet is focused on securing sustainable income over the long term.
- **Seasoned management team:** The management board has long term experience in the shipping and finance industry
- **Efficient operation** with high utilization rates and low relative opex leads to low break even points
- **Access to Capital Markets:** Listing on the Frankfurt Stock Exchange's Scale segment provides access to investors and growth capital.

Weaknesses:

- **Reliance on the shipping segment:** The traditional, medium-sized ER Group's business activities are based on the Shipping segment.
- **Exposure to US dollar:** Average charter rates for the fleet are calculated in US dollars, exposing ER to currency fluctuations, which may impact profitability. However, a large share of the costs is also booked in US dollars.

Opportunities:

- **Exploiting Market Developments:** Identifying and exploiting opportunities is a central element of the ER Group's strategic focus.
- **Stock exchange listing:** The listing of ER on the Frankfurt Stock Exchange provides access to investors and growth capital.
- **Long-standing experience:** Long-standing shipping and financing expertise and access to international market players are a basis for the future success of the ER Group.

Risks:

- **Risks in the shipping segment:** Dependency on performance of the global economy and individual national economies.
- **Decline of charter rates:** Sharply declining charter rates and reduced fixing times might have a negative impact on the operational performance of Ernst Russ.
- **External factors** such as pandemics, oil price fluctuations, accidents or piracy

FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR 21.09 per share based on 2025E and EUR 12.73 per share on 2029E estimates.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in EURm	2025E	2026E	2027E	2028E	2029E

Source: Company data; mwb research

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 8.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable. A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.**

Peer group analysis

A peer group or comparable company (“comps”) analysis is a methodology that calculates a company’s relative value – how much it should be worth based on how it compares to other similar companies. Given that **Ernst Russ AG** differs quite significantly in terms of size, focus, financial health and growth trajectory, we regard our peer group analysis merely as a support for other valuation methods. The peer group of Ernst Russ AG consists of the stocks displayed in the chart below. As of 28 August 2025 the median market cap of the peer group was EUR 944.6m, compared to EUR 235.8m for Ernst Russ AG. In the period under review, the peer group was less profitable than Ernst Russ AG. The expectations for sales growth are higher for the peer group than for Ernst Russ AG.

Peer Group – Key data

Comparable company analysis operates under the assumption that similar companies will have similar valuation multiples. We use the following multiples: EV/EBITDA 2025, EV/EBITDA 2026, EV/EBIT 2025, EV/EBIT 2026, P/E 2025 and P/E 2026.

Applying these to Ernst Russ AG results in a range of fair values from EUR 4.34 to EUR 20.72.

Risk

The chart displays the **distribution of daily returns of Ernst Russ AG** over the last 3 years, compared to the same distribution for SFL Corporation Limited. We have also included the distribution for the index Germany DAX (TR). The distribution gives a better understanding of risk than measures like volatility, which assume that log returns are normally distributed. In reality, they are skewed (down moves are larger) and have fat tails (large moves occur more often than predicted). Also, volatility treats up and down moves the same, while investors are more worried about down moves. For Ernst Russ AG, the worst day during the past 3 years was 03/06/2024 with a share price decline of -10.6%. The best day was 15/03/2024 when the share price increased by 22.5%.

Conflicts of interest

Disclosures regarding research publications of mwb research AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures. It is essential that any research recommendation is fairly presented and discloses interests of and indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if mwb research AG

- (1) or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the terms of such an agreement,
- (4) or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of mwb research AG or its affiliate(s),
- (5) or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure
Ernst Russ AG	2, 8

Important disclosures

1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by mwb research AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of mwb research AG. Reproduction of this document, in whole or in part, is not permitted without prior permission mwb research AG. All rights reserved. Under no circumstances shall mwb research AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organizational Requirements mwb research AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of mwb research AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made. The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at <https://www.mwb.-research.com>.

mwb research AG uses the following four-step rating system for the analyzed companies:

- **Speculative (Spec.) BUY:** Sustainable upside potential of more than 25% within 12 months, above average risk
- **BUY:** Sustainable upside potential of more than 10% within 12 months
- **SELL:** Sustainable downside potential of more than 10% within 12 months.
- **HOLD:** Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of mwb research AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by mwb research AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of mwb research AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Date and time of first publication of this financial analysis
28-Aug-25 09:20:35

6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no or very little actual trading there and that published prices are not based on actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.

7. Major Sources of Information Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. mwb research AG has checked the information for plausibility but not for accuracy or completeness.

8. Competent Supervisory Authority mwb research AG are under supervision of the BaFin – German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.

9. Specific Comments for Recipients Outside of Germany This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.

10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under <https://www.mwb.-research.com>.
